

12th February 2019

F.a.o: Mr Steve Davies

Chief Inspector.

Aberystwyth Police Station.

Park Avenue Aberystwyth,

SY23 IPH

Dear Mr. S. Davies,

Further to my letter of the 8th of this month. Without seeming to direct your investigations may I suggest Mr Reese may wish to ask them the following questions and not be influenced by their position or standing.

1. Why: did he specify (at every examination) I put the Lumigan eye drops, one in each eye, at “**bedtime**.” This is **not** the correct timing; which is “***no later*** than the evening.” See the GMC. (I have a recording.)
2. Ask him why: when I showed him the Medical papers from Professor Hayreh (of which he later admitted being aware) which states ***conclusively*** that Lumigan should ***never*** be applied at bedtime - because it can cause NAION; awakening blindness; this he did, in my case. The GMC formulary states ***no later*** than the Evening for this Lumigan application. And, as ***a consultant***, he would be aware of this ruling.
3. Ask him why: he refused to assist me when I returned to him blind and naively showed him the papers? While he has a right to deny me any medication, why did he refuse to ***discuss any means*** of restoring my eyesight? This by a consultant. Was it because he had achieved his intention? Now blind.
4. Ask his assistant Dr. Paul, why he used the ***pretence*** of taking an eye pressure test to stab me in the eye? He had no records; he made no reference to the reading; (normally he would have) He made no notes of it; and only ***pretended*** to take the e.p. of *one* eye, after placing anaesthetic in both eyes? Was his charade of an e.p. test to facilitate his “stab in the eye?” Yes; without question or opposition.
5. Ask the consultant why: He said his MRI head scan was perfectly safe - and then ordered ***multiple scans*** to require 80 minutes in duration? He ***knows***, as a consultant, how long these head scans take; approx. ***40*** minutes. So why did ***he order multiple head scans*** to take ***80*** minutes? Ask him why? (Verified at the time by the radiologist who confirmed, “ You would have to ask the consultant.”)

These scans were ***twice as long*** as a normal scan, and ***grossly, dangerously, excessive***. Why? Scans beyond the GMC formulary of 40 minutes. The ***maximum time*** allowed is ***60*** minutes. Why did he order multiple scans to take ***80 minutes?*** Twice the normal time and, sufficient to cause a stroke, or embolism, and likely death. Why did this knowledgeable ***consultant*** order these ***grossly excessive dangerous*** multiple scans? I suffered permanent headache for 3 years. He nearly killed me.

Can the consultant answer these points to your satisfaction? Because if not, you will know they are guilty. I cannot teach you your job; but apply the litmus test; if it were you, your wife, or anyone! Would you wish them to suffer these actions? To be blinded, and your life destroyed, like this? ***Simply Evil***.

They destroyed my eyesight. When I naively showed them how (and how to put it right!) they decided to finish me, once and for all. With the stab in the eye, and ***grossly excessive*** MRI head scans. Attempted murder by proxy. Would you like to be their next patient? They ***know*** what they did; they know, I know. Please, charge them and stop their evil. If not for me, for all who follow after me.

Yours most sincerely

Jerome Thomas.

Sent by recorded delivery

Dear Mr. Davies,

Today received a telephone call from your colleague Mr Reese. He confirmed he would not proceed with my case. I believe he arrived at this decision in error and, I will appeal. Briefly: His arguments were:

1. The *only* reason he gave was too many persons of professional standing supported them? (he cited 9-10 in number, Dr Barr, etc.) And, that I should pursue medical negligence. (which is time expired.) Medical colleagues *do* stand together. To quote numbers in the same profession is not a valid reason to presume innocence. They may like him, will not criticise his work, and therefore are *incapable* of giving an unbiased assessment of his guilt. (or innocence) A ballot box "vote" does not make him innocent. It is as if you asked a blind man about a colleague, "what did you see"? Nothing, would be the reply
2. I have sought the assistance of the NHS, and been called a liar. I have sought the assistance of the GMC, who belittle me and deny it all; saying these doctors have done no wrong. This is *simply not true!* If a plumber had blinded me with a pipe, or a boxer with his fists, would you view it differently? Simply because they are doctors does not mean they are innocent of this violence; in fact, they have a much easier way of concealing it. I have detailed what they did which was contrary to both the GMC formulary and the many medical papers supplied. They were ***criminally wrong*** to treat me (or anyone) that way.
3. Their actions were deliberate. Not accidental, not negligent, but *deliberate*. These doctors are well trained consultant professional men who are ***fully aware*** of what they have done, and are escaping justice by the police refusing to charge them. I cannot make you charge them; if you do not you pervert the course of justice. They prescribed Lumigan and order MRI head scans *EVERY* day. They know the effects completely. They told me to use Lumigan at bedtime. (a recording to this effect) and later, did order a multi-scan MRI head scan to ***knowingly excessively exceed*** the statutory safe limit. This was a direct attempt to cause my death by proxy. Also: From the start to the finish - he lied to me. And now, he lies to you. *Please*: stand up to them. I swear to God, I tell the truth.

I look to the police for justice. Not only for myself; for the people who follow after me. The police are my last resort in bringing a prosecution, and yet you refuse, because you do not want to ruffle "feathers"!

I look to you, the police, to be upstanding and rightly denounce their evil; to bring them to book. To see justice is done and not perverted. ***Please***, do not let them get away with this. They will do it again if you do not stop them. I beg you - to do the right thing and stop these doctors blinding and attempting to kill people. It's that simple. You *need* to do this. To send a clear message; that they cannot escape justice.

I ask for nothing. No money, no help with my eyes, nothing at all, only they get stopped. (charged)
Yours most sincerely,

Jerome Thomas
